

KATIE ZALEWSKI

MVP Health Care

Katie is the Talent Development Lead at MVP Health Care responsible for operating their internal and external talent development initiatives. She plays a key role in the employee experience by developing and facilitating core programming such as onboarding, compliance initiatives, leadership development, in addition to system and tool implementation and consultative requests.

As a key driver of change paired with her innovative mindset, she aided the swift transition of all instructor led programs to a virtual environment without minimizing the employee experience - fueled by current events, but also her desire to create memorable moments for all employees, as well as a sense of belonging.

Katie is a transplant to the Capital Region by way of New York City, but you would never guess! She wholeheartedly immerses herself in her community of Saratoga Springs. Her passion to build connections, meet new people, and grow her network is evident. Outside of work she serves on the American Cancer Society Board of Ambassadors, takes advantage of volunteer opportunities, attends many local events and social fundraisers. You can find her walking/running in the park or tending to her garden patio. Be sure to say hello!
