

KEVIN HENNION

Turner Construction Company

Kevin Hennion is a Project Engineer for Turner Construction Company currently assigned to the North Colonie Central School District 2017 Capital Project. Born and raised in New Jersey, Kevin started his career with Turner Construction 10 years ago this October after graduating from Utica College. Kevin began his career as a Field Engineer assigned to the Green at Florham Park – BASF's North American Headquarters.

At that time, this was New Jersey's largest project and the project obtained LEED Double Platinum certification with the U.S. Green Building Council (USGBC), which is the highest LEED status a building can achieve. Following the completion of the Green, Kevin took on different assignments in different departments with the most recent being promoted to Project Engineer in Operations. In his role as a Project Engineer, Kevin manages and supervises at a project level all engineering and administrative policies, procedures, and functions. His duties include a wide variety of tasks, including but not limited to having a comprehensive understanding of all contract documents/drawings/specifications, streamlining all means of communication amongst all project team members, managing financial status of the project including monthly reports to the Client and leading all subcontractor/owner meetings as well as Board of Education Construction Updates.

Kevin continues to involve himself with volunteer events hosted by Turner Construction throughout the Capital Region. He has become a "go-to" person for many Engineering related items and has spearhead multiple projects for Turner Construction including redeveloping Operational Review Meetings and On-Boarding Staff at the Project Level through transferring of knowledge and promoting the growth of younger staff members. In addition to his Engineering role, Kevin is currently in the process of standardizing budget management tools for the Business Unit for Construction Management Agency K-12 Projects. Kevin brings nearly a decade of knowledge of the construction industry with regards to building, estimating, purchasing, cost and budget analysis, and engineering.

In his free time, Kevin enjoys gatherings with friends, exercising, fishing, sports with his son, guitar, drums, and golf. Kevin currently resides in Clifton Park with his fiancé and 6-year-old son.
